

ATTENTION ALL COMMUNITY GARDENERS!

Summer Planting Tips *for* Growing Better Quality Food

CENTER FOR
GREEN TECHNOLOGY

445 N Sacramento

Saturday, May 17

9 am-10 am

On Saturday, May 17 from 9 am -10 am, we invite all community gardeners to jump start your summer gardens with tips and plants! Three members of Connecting Chicago Community Gardeners (CCCG), Michael Webb, Dr. Shemuel Israel, and Angela Taylor, will share their favorite quick tips about soil and its care, planting transplants, companion planting, as well as fertilizing and watering your summer vegetables.

After the mini workshop, all gardeners will select free summer seedlings grown organically by CCCG members including sweet potato, heirloom tomatoes, basil, collards, and kale. We will also have a variety of free vegetable seeds to distribute.

Please RSVP to Ellen Newcomer at ecnewcomer334@gmail.com
