

Tools and Tech for Tight Spaces

equipment and management system solutions for urban growers

Using the right tool for the task can save time, decrease costs, protect farmer health and safety, and simply get the job done right the first time.

Northern IL Young Farmers and Extension staff will demonstrate research results and experiences with irrigation and fertigation systems, and also showcase other tools used at the SoSuCo Farm. Attendees will be able to try using some tools in "real-life" conditions.
